## General Comment

I have spent many summers visiting the Chesapeake Bay in McDaniel, Maryland. It is a beautiful area and critical habitat for marine life and waterfowl. The time has come to enforce a strict clean up plan for the Bay with deadlines to ensure compliance and strong consequences for failing to meet deadlines or clean up targets. The clean up must be enforced by government regulations with a strong, accountable final TMDL, and to continue working with the states to ensure that their plans will deliver much-needed results to restore the health of the Chesapeake Bay.
